

How to tie your Bridle

Step 1:
First feed the rope over and down through the ring of the bit and back around on top of itself, [Pic 1]

Step 2: [Pic 2]
Now feed the rope under and up through and over the ring and under the rope [it should look like pic 3]

Make sure the two ropes run side by side

Step 3: [Pic4]
Now feed the rope up through the loop of the hanger and bring it under and back around and back under itself to form a figure 8 [see pic 5]

[Use the figure 8 tie for the throat latch]

If everything's done right it should look like this
[Pic 6]
